

GitHub Campus Advisors

Teacher training to master Git and GitHub

What is Campus Advisors?

- Teacher training to master Git and GitHub
- Four modules for you to complete at your own pace
- Taught by the Manager of Teacher Programs, Vanessa (a.k.a. @mozzadrella)

GitHub Education

Module 1	Basics: Git internals
----------	------------------------------

Module 2	Individual work
----------	------------------------

Module 3	Group work
----------	-------------------

Module 4	Student programs
----------	-------------------------

To get started:

1. Register for an account on github.com. You'll use GitHub for hands-on activities.
2. Download, install and configure git. (For Windows folks, Git for Windows is recommended). In your terminal, configure Git to recognize you:

```
git config user.name "First Last"
```

```
git config --global user.email "email@example.com"
```
3. Education.github.community: We're using these forums as our learning management system (LMS). You'll accept and post assignments in the Campus Advisors section of the community.
